1. Creating GitHub Repository
2. Catching Up and continuing- Chapter 1 (Learning the Bash Shell)

# May 26<sup>th</sup>

## 1. Creating GitHub repository

For collaborative work and sharing my progress, I created a GitHub repository and a Lab notebook file.

## 2. Catching up and continuing- Chapter 1 (Learning the Bash Shell)

Before the start of the Internship, I had already started studying the book “Learning the Bash Shell” until 1.6- Files. Today I restarted my study from that chapter. Also, I documented everything from chapter 1 into a .txt file. A catch up of all of the commands I learnt and what they do is provided in the *chapter1.txt* file.
